

## HOW TO ENABLE XXX ADDON TO THE BEAST BUILD ON KODI KRYPTON v17.x

*Created by Philip Laudicina 02/13/2017*

***NOTE: This tutorial is based on that you have already installed KODI.  
You should also run the fresh start app prior to installing any new builds.***

Start KODI, Navigate to APPS, and click on Maintenance Tools

Click BACK arrow button on remote once.

Advanced Settings, Select DEVICE TWEAK

Click on ECHO ADDON INSTALLER

Click on ADULT (XXX) ADDONS

Click on which ADDON you would like to install, and then select INSTALL ADDON

That is it! you have successfully installed your ADDON.
